#### Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

|                                                                                                                |                                                                                                       |                                                                                                                                                                                         |
|----------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>I am</b>                  | <i>Describe customer with 3-4 key characteristics – who are they?</i>                                 | A patient who needs quick and reliable medical consultation. I value convenience, timely appointments, and easy access to qualified doctors.                                            |
|  <b>I'm trying to</b>       | <i>List their outcome or "job" the care about – what are they trying to achieve?</i>                  | Book an appointment with the right doctor based on my medical condition, preferred specialty, available time slot, and consultation fee without visiting the hospital physically.       |
|  <b>but</b>                 | <i>Describe what problems or barriers stand in the way – what bothers them most?</i>                  | It is difficult to find the right specialist, compare doctors, view real-time availability, and secure an appointment without long waiting times or double bookings.                    |
|  <b>because</b>             | <i>Enter the "root cause" of why the problem or barrier exists – what needs to be solved?</i>         | Many hospitals still rely on manual appointment systems or outdated booking methods that lack real-time slot management, intelligent doctor recommendations, and instant notifications. |
|  <b>which makes me feel</b> | <i>Describe the emotions from the customer's point of view – how does it impact them emotionally?</i> | Frustrated, anxious, and uncertain because delays in booking medical appointments can affect my health and waste valuable time.                                                         |

Our Solution: An AI-powered Doctor Appointment Booking System that recommends the right doctors, shows real-time availability, prevents double-booking, and sends instant confirmations and reminders.

#### Problem Statement

(PS)I am (Customer) :

I 'm trying toButBecauseWhich makes me feelPS-1

A busy working professional seeking immediate medical consultation for a sudden health issue.

Find a qualified local specialist and secure a guaranteed appointment slot on my mobile phone.

I repeatedly run into outdated doctor schedules, conflicting bookings, and tedious manual forms.

The local clinics lack a centralized, real-time database engine that locks slots instantly upon booking.

**Frustrated, anxious about my health, and exhausted** by wasted time.

## **PS-2**

A medical specialist running a private clinic with high daily patient volumes.

Streamline my calendar, manage my daily consultation queue, and block off-duty or vacation days smoothly.

I suffer from accidental double-bookings, high patient no-show rates, and administrative chaos.

The current front-office process relies on manual spreadsheets that do not sync with live automated patient reminders.

**Overwhelmed, stressed, and unable** to focus fully on delivering high-quality patient care
