#### Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

#### Purpose:

- **Fit Customer States:** Design an easy-to-use booking interface that accommodates stressed, sick, or less tech-savvy patients.
- **Tap Existing Behaviors:** Drive quick adoption by sending instant booking confirmations and reminders via SMS or WhatsApp.
- **Target Key Triggers:** Align system messaging to target patients the moment they experience frustrating clinic hold times or sudden symptoms.
- **Build Trust & Solve Annoyances:** Eliminate frequent daily annoyances like double-bookings and long physical waiting room times.
- **Improve the Status Quo:** Map out current healthcare scheduling struggles to create a far more efficient, unified digital experience.
