

Project Design Phase-II

Data Flow Diagram & User Stories

Date	14 July 2026
Team ID	
Project Name	Book a Doctor
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

User Stories:

Here is your complete Book a Doctor System product backlog mapped directly to mobile registration flows and fully populating the roles for the Patient (Mobile user) and System Administrator:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task
Customer (Mobile user)	Registration	USN-1	As a user, I can register the application by entering my details

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
			my email, password, and confirming my password.			
	Registration	USN-2	As a user, I will receive a confirmation email once I have registered for the application.	I can receive a confirmation email & click confirm	High	Sprint-1
	Registration	USN-3	As a user, I can register for the application through Facebook.	I can register & access the dashboard with Facebook Login	Low	Sprint-2
	Registration	USN-4	As a user, I can register for the application through Gmail.	I can successfully register & access the dashboard with my Gmail Account	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password.	I am authenticated and redirected to my dashboard	High	Sprint-1
	Dashboard	USN-6	As a patient, I can view my active, upcoming, and past doctor appointments	Dashboard renders upcoming bookings with	High	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
			directly on my landing page.	doctor name, clinic address, and times		
	Search & Discovery	USN-7	As a patient, I can search and filter doctor results by medical specialty, consulting fees, and real-time availability.	Search displays matching doctor listings with active status and real-time open slots	High	Sprint-2
	Booking Engine	USN-8	As a patient, I can select an open slot on a doctor's calendar and book an appointment.	Selected slot is reserved, locked from double-booking, and confirmation details are saved	High	Sprint-3
Customer (Web user)	Profile Management	USN-9	As a doctor, I can set up and edit my professional medical profile (specialty, fee, clinic address, and qualifications).	Profile edits save to the database and update on the public doctor search directory	High	Sprint-1
	Calendar Setup	USN-10	As a doctor, I can configure my weekly working slots and dynamically block out vacation or off-duty days.	Calendar blocks out designated unavailable days and prevents patient bookings on those times	High	Sprint-3

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
	Consultations	USN-11	As a doctor, I can view my daily scheduled patient roster and log digital prescriptions during visits.	Consultation reports save securely, and patients receive a downloadable PDF prescription	Medium	Sprint-4
Customer Care Executive	Booking Support	USN-12	As a support agent, I can search for patient appointments and manually reschedule or cancel bookings on customer request.	Support desk can search accounts by phone/email and perform manual overrides or cancellations	Medium	Sprint-4
Administrator	Verification & Audits	USN-13	As an administrator, I can review, verify, and approve doctor credentials and licenses before activating their public profiles.	System isolates unverified doctors and restricts them from accepting appointments until manual admin sign-off	High	Sprint-2
	Platform Analytics	USN-14	As an administrator, I can view system-wide platform statistics, registration trends, and appointment completion rates.	Admin dashboard populates clean summary charts showing daily active bookings and system transaction volumes	Low	Sprint-4
